- No Upfront Costs
- Works with Existing Infrastructure
- Increase Uptime & Reduce Liability
- Gain Visibility & Mgmt. Tools

Save on your POTS Line Replacement System

POTS LINK CUT THE COPPER

Why POTS Link

Maintaining old telephone service lines is becoming increasingly difficult. Since the FCC sunset, prices have been rising exponentially while service and support are dwindling day by day.

POTS Link effortlessly converts your existing analog phone line wiring signals into a cost-effective, supported digital wireless connection.

What's In The Box?

Connected by Cradlepoint, these purpose-built endpoints provide industry-leading connectivity and are sold with a subscription to NetCloud Service for IoT, enabling streamlined configuration and continuous cloud, modem, and router software feature enhancements.

How Much Could You Save?

Typical Cost Savings

40-60%

Per POTS Line, Per Month

POTS Link scales with your needs and enables you to choose the best carrier based on your signal strength at each location with unlimited data.

Use Case

A major university needed a POTS Line replacement solution that would offer cost savings on their telecom expenses. After implementing POTS Link, not only are they saving \$2,700 every month, but they also receive enhanced support and better service.
